

**AMENDMENTS TO THE SPECIFICATION**

Please delete the paragraph beginning on page 6, line 25 and ending on page 7, line 4 of the original Specification and replace it with the following paragraph:

The device includes a rotatable spinner or disk 100 with a handle 102. The disk 100 is mounted for a rotation on an annular rim [[104]] of a formation on the container 21. The cassette 1 has an annular flange 106 around its outer wall resting on the shoulder 104 such that rotation of the disk 100 rotates the cassette to provide the twist in the tubing 2. In an alternative embodiment (not shown) the annular flange 106 on the cassette rests on a formation in the container itself and the disk 100 includes formations such as lugs engaging co- operating formations such as notches in the cassette. In either event a simpler means of rotating the cassette, and with less resistance to rotation, is provided.
